III.—SYSTEMATIC.

The classification of Sharpe's "Hand-list" is here followed as regards orders and families. The genera are arranged alphabetically in the families. This method is a change from the old system, as so many alterations in nomenclature and generic status have been introduced since the publication of the "Hand-list."

Full references are given only in the case of new genera and species. In other cases the numeral in heavy Clarendon refers to the List of Titles, where the full reference will be found. The figures in smaller Clarendon refer to the volume number of the full reference.

THIRD SUPPLEMENTARY LIST OF ABBREVIATIONS, WITH
TITLES OF PERIODICAL PUBLICATIONS, CONTAINING
PAPERS DEALING WITH MATTERS OF ZOOLOGICAL
IMPORTANCE.

Since the issue of the last volume of the Zoological Record a number of new periodicals have commenced publication, a few old ones have been revived, while a few have been accidentally omitted from the list published in the Record for 1930.

It has therefore been found necessary to print a third supplementary list of these. It is hoped to publish with the next volume of the Record a new and revised list arranged in accordance with the new edition of the "World List" recently issued.
